P-2905 Fuel Tables (Continued)

E. Payment Rate (2906.2)

Funding is anticipated to be insufficient to meet 100 percent of the calculated benefit. The department will pay each season's fuel benefits at a percentage of the calculated benefit. The department will determine this percentage for the first benefit issuance after all applications have been entered into ACCESS and the number of eligible applicants can be determined. Then the percentage is adjusted, if necessary, based on eligible applications submitted after the initial benefit issuance.
