

## **Kyle Age 9**

### **My favorite things:**

I like being outside. I like to be active. I love the woods. I like four wheelers and cars. I like to use my imagination. I like walks. I enjoy visiting family and supports. I like to joke around.

### **Things I do not like:**

I do not like to be told no. I struggle with limits being in place. I actually do not like watching a lot of tv. I don't like being indoors too long. I do not like garlic in my Mac and Cheese!

### **Favorite foods:**

I am not a picky eater! I like most foods.

### **What I want in a family:**

An active family that will do things with me. A family that will allow me to be outdoors and explore. I like to know how things work.

### **What I want families to know about me:**

I like to play. I like to be outdoors. I am still close to my family. I like to fix things and work with my hands.

### **What we want families to know about the youth:**

Kyle would be better as only child or older siblings if needed. Kyle at times has trouble expressing himself. He struggles with limits and always needs choices. A family that can help him with his emotions. He will need a family who can work on teaching him some social skills. A family that is familiar with attachment issues and childhood trauma. He will work best in a family that can provide structure and predictability. Better the structure, better the behavior. Routines and being consistent are huge for him to be successful. He bonds better with men at this time. He still is very connected with his biological family.
